: *The effect of Return on Asset, Leverage, Size for Tax Avoidance through Corporate Social Responsibility (CSR) at A Coal Sector Companies listed on the BEI on 2016-2018*

The purpose of this study is to determine the effect of return on assets, leverage, size on tax avoidance through corporate social responsibility disclosure. The object of this research is the coal industry manufacturing companies listed on the Indonesia Stock Exchange during 2016 to 2018. Nonprobability sampling with side purposive sampling technique was the researcher used to get the sample. The number of samples were 14 companies.

The analysis of data that used for this research was path analysis. This study found that return on assets and size had a positive effect on corporate social responsibility. Leverage had a negative effect on corporate social responsibility. Corporate social responsibility and leverage negatively affect tax avoidance. Return on assets and size positively effect tax avoidance. In the other side, Corporate Social Responsibility (CSR) only able to mediate variable leverage with tax avoidance.

Keywords : *Return on asset, Leverage, Size, Corporate social responsibility, dan Tax Avoidance*
